

Opposition Group – no more turbines for Sancton

AIMS

Purpose 1:

Fight the proposal by REG Power to build any more turbines in Sancton parish in order to:

1. Avoid the cumulative effect which would create a windfarm landscape rather than a landscape with windfarms
2. Allow residents, visitors and those passing through to continue to enjoy an environment free from unreasonable noise and visual intrusion
3. Safeguard the archaeological important area from being desecrated

Purpose 2:

Support other parishes and action groups across the east riding of Yorkshire in the 'Enough is Enough' campaign in order to:

1. Stop the spread of further windfarms across the county which has already met its target for wind energy set by the government

Purpose 3:

Engage with the local community in order to:

1. Create a more positive and informed attitude to our objections
2. Strengthen the opposition to any more turbines
